Państwowa Wyższa Szkoła Zawodowa - Fizjoterapia

ABOUT ME

Hi! My name is Alan Dominiczak. I'm a creative, open-minded and fast learning person. For over a year I have been learning Front-End technologies. At this time programming became my passion and problems solving - my hobby. Every day I develop my skills to become better and better. In the near future I'm also going to get to know more about Back-End technologies.

I am looking for a job as a Junior Front-End developer in Poznań to change my passion into daily work.

ABOUT MY PROJECTS

Bookmark App - web application that allows to add the favourites websites to bookmarks. It was created based on technologies: HTML5, Sass and JavaScript. I also used Local Storage.

Speedway Generator - website that allows to generate a program for speedway events. The technologies used are HTML5, Sass and JavaScript. The main assumption was to captured the form data and generated a ready speedway program as a .xlsx file.

Weather App - single page application created with the help of React. It's a weather application allows to check the weather forecast in any city. In this project I used Open Weather API.

Wallet App - simple web application created based on HTML5, Sass and JavaScript. This app helps to control the status of your wallet.
